Career Objective

Seeking a Data Analyst role where I can use my skills in Excel, SQL, Power BI, and Tableau to clean data, create meaningful dashboards, and deliver insights that help the company improve decision-making and business performance.

Skills

Technical Skills:

- Data Cleaning & Preparation
- Data Visualization
- Reporting & Dashboarding

Tools:

- Excel, Power BI, Tableau

Database:

- SQL

Soft Skills:

- Analytical Thinking
- Problem Solving

Projects

Banking Data Analysis Project | Power BI, Tableau, Excel, SQL

View Project: https://github.com/vaishnavi-analytics-18/Bank-Analysis-Project-

- Analyzed banking and loan dataset to evaluate customer behavior, loan performance, and risk patterns
- Cleaned and transformed raw data using Excel and SQL (joins, aggregations, filtering)
- Built interactive dashboards in Power BI using KPIs, slicers, and charts
- Created visual reports in Tableau using filters and parameters for insights
- Analyzed key metrics such as loan status, default rate, customer segments, and revenue trends
- Provided data-driven insights to support business and credit decision-making

Education

- BCA – Maharaja Agrasen Institute of Information & Technology
- 12th (Commerce) – S.D. Public School, Jagadhri
